

Virtualenv

```
>> which python3
```

```
<< /Library/Frameworks/Python.framework/Versions/3.6/bin/  
python3
```

```
>> virtualenv -p /Library/Frameworks/Python.framework/  
Versions/3.6/bin/python3 venv_name
```

OR

Url. <https://gist.github.com/Geoyi/d9fab4f609e9f75941946be45000632b>

Install pip first

```
sudo apt-get install python3-pip
```

Then install virtualenv using pip3

```
sudo pip3 install virtualenv
```

Now create a virtual environment

```
virtualenv venv
```

you can use any name insted of **venv**
