Create and insert slug in DB (social media)

Modal.py

```python
from django.db.models.signals import pre_save
from django.dispatch import receiver
from django.utils.text import slugify

class Post(models.Model):

    STATUS_CHOICES=(
        ('draft','Draft'),
        ('published','Published')
    )

    title   = models.CharField(max_length=200)
    slug    = models.SlugField(max_length=100)
    author  = models.ForeignKey(User, related_name="blog_posts",   on_delete =
models.DO_NOTHING,)
    body    = models.TextField()
    status = models.CharField(max_length=100 ,choices=STATUS_CHOICES, default='draft')

    def _str_(self):
        return self.title

#this method create slug automatically
@receiver(pre_save, sender=Post)
def pre_save_slug(sender, **kwargs):
    slug=slugify(kwargs['instance'].title)
    kwargs['instance'].slug=slug
```
